

## The ASTM Textiles Standards Collection Spanish

Get access to Spanish Translations for the most popular textiles standards!

This collection includes several of the most referenced ASTM standard test methods, practices, and specifications developed by ASTM International Committees:

### D13 — Textiles

**From Section 7:** Textiles – Featuring textile-related standards covering the characteristics, properties, nomenclature, and uses of textiles. These tests, practices, and specifications cover:

- Apparel and fabric
- Care labeling
- Chemical conditioning and performance
- Cotton, yarn, fibers, wool, and felt
- Flammability and flame-resistance
- Glass fiber
- Home furnishings
- Inflatable restraints
- Pile floor coverings
- Subassemblies, such as zippers, hooks, and loops
- Tire cord and fabrics

The translated collection also contains some standard body measurement charts used for the sizing of apparel for men, women, children, and infants; standard guidelines for care labeling of apparel and other textile products; standards for UV protective fabrics and clothing; and a practice for stitches and seams, which has replaced the Federal standard for apparel end item stitch and seam structures used worldwide by government and industry textile organizations.

Translated standards are continuously added to this collection every year. Once part of the collection, a translated standard is maintained up to date with the English version.
